

FIELD TRIP LESSONS AVAILABLE

Our education team has lessons available for five different concepts. Availability varies by grade level, Pre-K through 8th grade. Please contact our team with any questions or for scheduling. Lessons must be scheduled in advance.

Kobe Louis – Director of Education, klouis@mpmns.org

Abigail Sharpe – Education Assistant, education@mpmns.org

PRICING GUIDE

\$3 per class, per student in addition to the group admission rate of \$7 per student

Minimum of 5 kids per lesson

Maximum of 25 kids per lesson

Purchase includes full access to the aquarium & grounds.

If you have a group larger than 25 students, you may be asked to break into two separate sessions for back-to-back lessons.

LESSONS AVAILABLE

Adaptations- Students will learn about different habitats and how animals have adapted to survive in the environment that they are in.

Introductions to Seasons- Students will learn about the 4 seasons and what different types of animals do during that season.

Weather- Students will learn how humans address weather and how it impacts local ecosystems.

Food Chain- Students will learn about the food chain and how each tier of producers, consumers and decomposers are important to each other.

Genetics- Students will learn about the science of heredity (genes and traits) and how they affect not only humans but animals as well.

Home School groups will have the option of choosing different subjects of curriculum depending on what they are going over that week.

See page 2 for lessons by grade.
